

# GrowthGel 10-50-10+Te

## GUARANTEED COMPOSITION (% w/v)

Component	Content
Total Nitrogen (N)	10% w/v
Phosphorus Pentoxide (P <sub>2</sub> O <sub>5</sub> ) Water Soluble	50% w/v
Potassium Oxide (K <sub>2</sub> O) Water Soluble	10% w/v
Boron (B) Water Soluble	0.026% w/v
Copper (Cu) Water Soluble	0.013% w/v
Iron (Fe) Water Soluble	0.013% w/v
Manganese (Mn) Water Soluble	0.013% w/v
Molybdenum (Mo) Water Soluble	0.006% w/v
Zinc (Zn) Water Soluble	0.026% w/v

## PRODUCT DESCRIPTION

GrowthGel 10-50-10+Te is a GEL formulation NPK fertilizer with high phosphorus content, ideal for stages where phosphate incorporation is crucial such as root development, flowering, fruit setting, and transplanting. All nutrients are fully soluble and readily assimilable by crops. The product also provides several micronutrients (B, Cu, Fe, Mn, Zn, Mo). Widely used in foliar application due to its high purity and solubility. Suitable for all crops: herbaceous and woody.

## GENERAL FEATURES

- High solubility of macronutrients (N, P, K).
- Manufactured with highly selected raw materials using advanced technology.
- 100% free of impurities and chlorine.
- No compaction or dust formation.
- Safe, convenient, and easy to handle.
- Formulation adapted to the needs at each crop growth stage.
- Stimulates vegetative growth effectively.

## TECHNOLOGY

Thanks to its gel structure, it increases retention time on leaves and reduces surface tension, enhancing stomatal and cuticular absorption. Acts as a protective colloid for nutrients, preserving their structure and properties, avoiding chemical degradation and evaporation losses. As a non-ionic gel fertilizer, it is compatible with most phytosanitary treatments. Its advanced nutrient and adjuvant-based gel technology enhances application preparation and nutrient efficacy. Homogeneous suspension, free from chlorine, sodium, and heavy metals. Concentrated and cost-effective.

## RECOMMENDED APPLICATIONS

- Foliar:

Crop	Dosage
Horticultural crops	200–250 cc/100 L
Fruit trees, Citrus, Vine	200–300 cc/100 L
Olive	250–500 cc/100 L
Extensive crops	200–250 cc/100 L

- Fertigation:

Crop	Dosage
Horticultural crops	4–8 L/ha
Fruit trees, Citrus, Vine	4–8 L/ha
Olive	4–8 L/ha
Extensive crops	4–8 L/ha

## PRECAUTIONS

Keep out of reach of children. Harmful if ingested. In case of contact with eyes or skin, wash immediately with plenty of water. Store in original container, in a dry place protected from extreme temperatures. Keep away from food, drinks, and animal feed.

## COMMERCIAL PRESENTATION

Homogeneous GEL suspension. High-quality, economical, and concentrated product suitable for all growth stages.
