

GrowthGel 30-10-10+Te

GUARANTEED COMPOSITION

Component	Content
Total Nitrogen (N)	30% w/v
Nitric Nitrogen (N)	7% w/v
Ammoniacal Nitrogen (N)	9% w/v
Ureic Nitrogen (N)	14% w/v
Phosphorus Pentoxide (P ₂ O ₅) Water Soluble	10% w/v
Potassium Oxide (K ₂ O) Water Soluble	10% w/v
Boron (B) Water Soluble	0.015% w/v
Copper (Cu) Water Soluble	0.018% w/v
Iron (Fe) Water Soluble	0.030% w/v
Manganese (Mn) Water Soluble	0.018% w/v
Molybdenum (Mo) Water Soluble	0.001% w/v
Zinc (Zn) Water Soluble	0.009% w/v

PRODUCT DESCRIPTION

GrowthGel 30-10-10+Te is a concentrated NPK fertilizer in gel form containing essential nutrients and high-quality additives. Its blue gel suspension is chlorine-free, sodium-free, and heavy metal-free, and its low pH increases nutrient availability. This high-nitrogen formulation promotes vegetative growth and is ideal for use during early crop development stages. The gel structure increases nutrient retention on the leaf surface, reduces surface tension, and enhances stomatal absorption.

FEATURES

- High solubility of macronutrients (N, P, K).
- Advanced manufacturing with high-purity raw materials.
- 100% free from impurities and chlorine.
- No compaction or dust formation.
- Safe, convenient, and easy to handle.
- Formulation adapted to plant needs at each growth stage.
- Stimulates vegetative growth effectively.
- Reduces soil pH and increases nutrient availability.
- Chelated micronutrients for higher plant absorption.
- Compatible with most fertilizers and agrochemicals.

APPLICATIONS AND DOSAGE

- Foliar:

Crop	Dosage
Horticultural crops	200–250 cc/100 L
Fruit trees, Citrus, Vine	200–300 cc/100 L
Olive	250–500 cc/100 L
Field crops	200–250 cc/100 L

- Fertigation:

Crop	Dosage
Horticultural crops	4–8 L/ha
Fruit trees, Citrus, Vine	4–8 L/ha
Olive	4–8 L/ha
Field crops	4–8 L/ha

PRECAUTIONS

Keep out of reach of children. Harmful if ingested. In case of accidental contact with eyes or skin, rinse immediately and thoroughly with water. Store in the original container, in a dry place and protected from extreme temperatures. Keep away from food, drinks, and animal feed.

COMMERCIAL PRESENTATION

Concentrated blue GEL. pH: 6–7. Density: 1.3 g/cc. Suitable for foliar and fertigation applications across all plant growth stages.
