

# Magnevit 500

## COMPOSITION

Component	Content
Magnesium Oxide (MgO)	50.0% w/v
Chelating Agents	6.5%
Diluents and Conditioners	43.5%
pH	8–9
Density	1.48 g/cc
Form	Suspension Concentrate
Color	White

## DESCRIPTION

Magnevit 500 is a suspension concentrate containing 50% MgO for both preventive and curative magnesium nutrition in horticultural and agricultural crops. The product is designed exclusively for foliar application, ensuring nutrient penetration directly into the leaves. It is not recommended for soil application as the compounds are immobile in the soil. Due to its very low EC, it is suitable even in high-radiation climates without causing leaf burn.

## FEATURES

- Highly concentrated fluid suspension.
- Safe for crops and effective in foliar nutrition.
- Low salinity allows for higher application rates.
- High compatibility with most plant protection products.

## RECOMMENDED DOSES

Crop	Dose	Application Instructions
Avocado	0.25–0.5 L/100 L	Apply twice: once during the spring flush and once in autumn.
Peach	0.5–1 L/100 L	Apply 2–3 times on fruit at intermediate development and at the start of pit hardening.
Lemon & Orange	0.5–1 L/100 L	Apply twice during the spring and autumn growth flushes.
Apple & Pear	0.5–0.75 L/100 L	Apply 2–3 times before fruit coloring, spaced 10–15 days

		apart.
Olive	0.25–0.75 L/100 L	Apply 3–5 times, 1–2 before flowering every 15–20 days.
Grapevine	0.25–0.75 L/100 L	Apply 2–3 times during pre-flowering at 40 cm shoot growth or on early chlorosis signs.
