## PRODUCT DESCRIPTION

Nutri Feed 15-5-35+2%MgO+Te is a high-solubility crystalline fertilizer designed for fertigation and foliar application. It is part of the Nutri Feed line, formulated with high potassium content for use during fruit/tuber formation and development until ripening. Proper potassium levels ensure high-quality yields and improve plant health and drought resistance. It contains 100% EDTA-chelated micronutrients and is available in nine intense colors for product and solution differentiation.

## FEATURES

- Enhances fruit quality and plant drought resistance.
- 100% EDTA-chelated micronutrients for maximum availability.
- Developed for open field and greenhouse fertigation; suitable for foliar application.
- Easy to handle, dissolve, and apply.
- Low in sodium and chloride.
- Available in 9 intense colors for product identification.
